Insect-a-clear Fusion 2 & 4

The Insect - a - clear Fusion range comprises of two models, the Fusion 2 “covers up to 100 m², size of 510x180x90 mm” and 4 “covers up to 280 m², size of 665x380x130 mm”. It is the ideal alternative to conventional high voltage machines. Unlike other insect control machines, the Fusion ranges have many features that make maintenance quick and simple. Stainless steel retaining plates simply lift open to allow the glue boards to slide from its position and the replacement board will slide in just as easily. When the time comes to change the lamps, the front can be removed without the need for any tools. With its unique ‘thru board light technology’ all the lamps can be seen from both sides of the machine, thus giving maximum attraction to flying insects.

The following features are incorporated on the Insect-a-clear FUSION:

- Made for suspending or wall mounting.
- Stainless steel construction or white powder coated.
- Easy servicing, just remove the end plate from either side for easy glue board replacement.
- Board life up to 3 months depending on environmental conditions and infestation.
- Shatter resistant lamp option available.
- Easy lamp change with tools free lift off front guard.
- Plastic fly killers can degrade and become brittle due to the effect of the ultra violet light. This model, being all steel, is unaffected by this.

Conforms BS EN 60335-2-59 and the European EMC directive. Full 2 year guarantee (except tube, starter and glue boards) terms & conditions apply.
