Protecta Bait Station – High Profile (HP)

The Original Tamper-Resistant Bait Station

Heavy-duty PROTECTA Bait Station is made of injection-molded plastic to withstand the toughest baiting situations indoors and out. This tamper-resistant bait station features a durable "living hinge" that lets technicians open and close the station over 100,000 times without fracturing.

PROTECTA Bait Station is large enough to accommodate six rats and holds up to one pound/450g of bait, a pint/475ml of liquid bait, or a T-Rex Rat Trap. Horizontal and vertical bait securing rods keep Bell's BLOX baits securely in the station. Bait also lasts longer because the rods elevate it above moisture build-up on the bottom of the station.

Bait Stations are an integral part of baiting. They keep bait away from children, livestock, pets and other animals, as well as protect bait from dust, dirt, moisture and other contaminants so bait stays fresh longer. Use them also to monitor rodent activity to determine areas of heavy and mild infestation.

PROTECTA Bait Station measures 11 1/2" x 12" x 6 1/2" (approx. 292mm x 305mm x 165mm) and is available in black, light gray and green to fit discreetly in any baiting environment.
