Insect-a-clear T160

The Insect-a-clear T160 range has been developed to assist hygiene managers meet the stringent requirements of the recently introduced Food Act. The specially developed ultra violet attractant tubes emit a full 60 watts of light output making the T160 extremely efficient. They are recommended for use in food factories, larger commercial kitchens, supermarkets, food preparation areas, and shops etc. The Insect-a-clear T160 can be either wall mounted, suspended or freestanding. All models in the T160 range are fitted with shatter resistant tubes.

The Insect-a-clear T160 incorporates the following features:

- Very quick and easy tube changing, the whole operation taking less than 90 seconds - without the use of tools.
- A large stainless steel insect catchment tray, with anti-crawl lips, is supplied on all models enabling hygienic cleaning to be carried out.
- Every machine has a quick release, stainless steel killing grid that can be removed, cleaned and replaced without the use of tools.
- The four tubes have been positioned to ensure that there are 2 tubes each side of the high voltage grid thus maximizing its killing potential.
- The specially designed ultra violet attractant tubes are widely used in the pest control industry and are readily available from your supplier.
- Comes complete with a fused mains socket for easy isolation. A neon also indicates when the power is on.

Conforms to BS 3456 part 201 and tested to BS EN 60335-2-59 . A full 2 year guarantee (except lamps & starters) terms and conditions apply.
