***Insect-a-clear* Compact Maxi**

There are 2 models in this range, one has a standard UV tube whilst the other, shatter resistant one. Both models can be wall mounted, suspended or free standing. The Insect-a-clear COMPACT Maxi has been designed for use in restaurants, food shops, kitchen areas, fast food outlets etc., indeed anywhere where flying insects present a problem. The Insect-a-clear COMPACT Maxi has been manufactured to the latest British and European standards. The outer casings are made from steel which is important because plastics can degrade with the effects of ultra violet light.

The following features are incorporated on the Insect-a-clear COMPACT Maxi:

- Made for suspending, wall mounting or free standing.
- All steel construction, zinc coated and then powder coated for excellent corrosion resistance.
- Electrical plug and socket on machine side allows easy isolation for servicing.
- Easy servicing, just undo the 2 screws for easy access to the tube and grid.
- Stainless steel killing grid.
- An aluminum catchment tray for easy and hygienic disposal of the dead insects.
- Shatter resistant tube option available.
- Plastic fly killers can degrade and become brittle due to the effect of the ultra violet light. This model, being all steel, is unaffected by this.

Conforms to BS EN 60335-2-59 and the European EMC directive. Full 1 year guarantee (except tube & starter) terms & conditions apply.
