## Trapper Mini-Rex

### Extra Strength Mouse Snap Trap

A smaller, mouse-size version of the powerful T-Rex Rat Trap, TRAPPER Mini-Rex embodies the most up-to-date snap trap design and technology. With better trigger sensitivity and more powerful trap velocity, TRAPPER Mini-Rex's patented interlocking teeth capture mice with unmatched holding power.

TRAPPER Mini-Rex is ideal for commercial and residential accounts, offering PMPs easy use on the job. It sets in one motion, like TRAPPER T-Rex. The same motion provides "no-touch" disposal of the captured mouse. The trap's built-in bait cup holds a dab of Bell's PROVOKE Mouse Attractant to entice mice to the trap. The cup can be removed safely and easily for servicing. Position traps along walls or wherever mice travel.
